None

None

Have a clear outline for the lecture and follow it. Assume that we the students know nothing about what you are about to talk about, and explain the material to us as such; refrain from asking if we know a certain skill or fact, which leads to awkward moments of silence, but rather assume that we don't (this is, of course, before you have explained the fact or taught the skill; please, for the love of Pete, open yourself to questions afterwards).

YOU TALK VERY SLOW!!!! Other than that, you do a good job, especially trying to incorporate the class. Cudos, sir.

instruction was very clear and easy to understand

To speed up the pace in which she gives instruction, very slow and boring.

Jeff could use more examples

I would say he needs to slow down just a little for some people, but other than that it was a really good instruction.

Mr. Gallant covered all parts of researching and finding information. He was clear and easy to understand. Very helpful.

Nothing he did and great job and was interactive.

Watch more Football than Soccer lol

none

This was actually a really understood lesson and I will be using it for future research papers. I feel a lot more comfortable about using the library.

I liked the basic knowledge given. Maybe the inclusion of unique tips not commonly known could be a clever way of opening trust towards the librarian staff. Also, due to the course I am currently taking is one of the starters it would be helpful to have examples of higher studying students with more intense research. Common questions they have asked and what were the responses given.

She was very good !

You answered my question about Galileo very well. I wish I learned it in my 1101 class. It should be a part of the ENGL 1101 classes to explain Galileo in the beginning so that we can get through the research for the class easier.

Don't be so nervous. :) You're lovely! :)

Not to be so monotone.

He could liven up his presentation, but he is fully knowledgeable about the library and assisting students.

You did a wonderful job; no improvements are needed.

There is nothing that I can think of for further improvement.

It was all good, and helped the audience to understand how to properly research on a site that is not Google.

I think he should enjoy futbol more.

I believe that suggestions for Howard Carrier improving this course is not necessary, he explained the course very well and greatly increased my knowledge when it comes to researching.

Let us go earlier

His presentation was really helpful, I see no need for improvements.

He explained everything to the point and was very clear.

What suggestions would you give [QID4-ChoiceGroup-SelectedChoices] for impr...

He did very well. He made sure that his point was coming across and wanted to establish that the reference librarians are very approachable and a resource that should be used.

It was fairly boring, however it was somewhat useful.

Just inform them on PDFs and HTMLs other than that it was very helpful. Thank You

Make presentation a bit more interactive. it was a little hard to hang on during the end of class. You are such a sweet woman though, thank you for taking the time to talk to us!

Everything is good

none

I have no additional comments. This was a good, informational lecture.

Nothing. She presented everything clearly and allowed each step to be hands on. Making the process hands on allows the student to remember how to utilize the online library with less issues post this demonstration. Thank you for your time, ma'am!

None, this will help me immensely now and the years to come. Thank you!

She is very great no changes

Congratulations on your new baby! Wooo hooooo! God Bless you

None. The class accomplished exactly what it was suppose to do. The material was a little bland but given the material I am not surprised.

none ginger was fantastic

She did everything well, I am fully aware on what to do now.

None.;

I would just make it a little more fun and personable to the students.

I would advice him to be more entertaining and exciting to keep students attention. Other than that, I think he did a swell job on showing us how to research papers. He seemed very concerned that we got everything we needed from this session. He kept asking was everything okay or did we understand everything which was a good thing.

Don't go so fast and show students how to exactly get to things.

Don't sound so dry. I kind of fell asleep because I couldn't focus on anything you were saying.

To keep the student's attention, I would speak with better projection and enthusiasm. Other than that, the information given was very important and useful.

He did great!

I would use a microphone to hear him better

Be more enthusiastic!

I now know where i can go and get research material and i know exactly how to look for it, as well as find the cite for the information i got.... Nothing needs improvement. Job well done.

I think maybe the Odum Library should be a mandatory session for a week to learn more in depth how to use the tool.

It was good how it was.

Mrs. Ginger needs to speak louder but other than that she was extremely helpful

Liven up.

I thought he was very clear and helpful.

Slow down and don't make it so tedious.

A bit fast and lost me at times; overall great presentation.

Did an awesome job!

The course was instructive and easily paced. I would try to allow the students time during the class to enter their own research topics in the various resources to get an idea of their own personal research, rather than one topic which does not apply to any of the students' work.

No comments. He gave a very good presentation

N/A I thought he did a very good job.

i SERIOUSLY DID NOT LEARN ANYTHING. THE GUEST WAS GOING TOO FAST, SHE DIDNT ASK US ANY QUESTIONS ABOUT IF WE NEEDED HELP UNTIL THE END, AND BY THEN THE CLASS WAS OVER. THE LESSON WAS CONFUSSING. I WOULD HAVE FELT A LITTLE BETTER IF SHE WOULD HAVE WENT STEP-BY-STEP. THE ONLY THING I LEARNED WAS HOW TO SET UP A VSU ACCOUNT, AND THAT WAS ON A HANDOUT SHE BRUNG.

need to slow down so students can follow

slow down just a tad, but great instruction

When showing how to go through Galileo maybe slow down so that we can understand what you are trying to do. And specify which databases that you are using.

I would say just slow down a little bit.

Slightly slow down when guiding students through a process of going through a webpage. However, the rest of the teaching was just fine.

Slowing down a little bit so everyone can catch up and do the same thing she was doing.

Make sure she is comfortable with her material before she starts.
